solution of sodium chloride and acetic acid. The range of highly elastic deformation of the DOS-30 copolymer extends from −40 to +220°C; the glass transition temperature is −40°C; the copolymer begins to cross-link at 220°C. Rubber mixtures based on SKDOS-30 copolymer were prepared in accordance with the standard recipe for SKS-30 rubber. The vulcanization of the mixtures lasted 20 min at 142±1°C. In physico-mechanical properties, SKDOS-30 vulcanizates are equivalent to rubbers based on SKS-30, with the exception of the fatigue strength, which is several times greater than that of SKS-30 rubbers.
